Of the 18,000 metric tons of phosphorus fertilizer (P_2O_5) to be imported by East Germany during the first quarter of 1954, delivery of only 10,300 metric tons was definitely assured as of [REDACTED]. Of this amount, 300 metric tons are to come from the USSR, 5,000 metric tons from inter-zonal trade, and about 5,000 metric tons from Luxemburg. Because of the current foreign currency situation in East Germany, no definite statement can be made concerning the remaining 7,700 metric tons.
